

Online Tools - Language / Translation

Updated August 2024

The Student Portal is the User Interface used by students to take online assessments. There are a variety of tools that may be available for an assessment. Available tools are determined by the Test Administrator and/or the Test Creator.

Translation Settings

Translation Settings

1. **Full Assessment Translation Settings:** If the Full Assessment Translation tool has been enabled, select the language to **Translate To** from the drop down menu, and select which **Text** to translate. Select **Apply** to display the translation.

The image shows a two-step process for using the translation tool. Step 1 involves selecting text in a question and clicking the 'Translate Selection' button. Step 2 shows the resulting 'Translate' window where the source text 'shape' is translated to 'forma' in Spanish.

2. **Translate Selection:** If the Translate Selection tool has been enabled, the option to translate selected text will appear with the Dictionary and Picture Dictionary lookup options. Select the **Translate Selection** button to open the Translate window. The selected Source Text appears. Select the desired **Translate To** language, and view the Translated Text.

Passage with Images

Read the passage and answer the following question(s).

The leopard

The leopard is a graceful, powerful and cunning big cat close to extinction. They live in sub-Saharan Africa, northeast Africa and southern China. However, many of their populations are endangered in southern Africa. Their main habitat is in the bush or in the mountains.

(Image 1: Image with alt tag)

The leopard is the most successful of all the big cats. It is also very comfortable climbing trees. The leopard is so strong it can haul the largest animal its killed into a tree to keep it away from scavengers.

Chanda. Kyle has 65 crayons. Which equation represents the relationship between the number of crayons, x , Chanda has?

C. $-5x^2 + 13x + 6 = 0$

D. $2x^2 + 5x - 33 = 0$

2

Which of the following is the approximate percentage of residents working in the technology sector that earn between \$50,000 and \$60,000?
