**FREE** weekly support group for any adult family member/caregiver/guardian who is living with or is directly & intimately involved in the life of *a child, ages 10 - 18, that suffers from suicidality.*

If you are intimately involved with a minor child who is struggling with suicidal thoughts, this group is for you!

#### PURPOSE: Family Love Support Group

This group was created as a result of a family who lost their son to suicide. Tragically, this amazing 13-year-old lost his battle with suicide and left behind a loving family. As a result of this traumatic event, his mother made it her mission to help others who find themselves in a similar situation. She knows the challenges that living with a suicidal child can bring. Including pervasive loneliness, loss of friends and/or family because of lack of knowledge and understanding on how to support you, fear of sharing with others & fear of judgement. Family's Love Support group is designed to provide a safe space where these families can find understanding, validation, and education on how to live within a suicidal child and how to seek treatment.

We believe that you need to help yourself first in order to help your child.
