

Gradual Release of Responsibility: I do, We do, You do

Fisher and Frey, 2007

Scaffolded instruction, or the gradual release model, is broadly recognized as a successful approach for moving classroom instruction from teacher-centered, whole-group delivery to student-centered collaboration and independent practice.

Sometimes referred to as “I do it, we do it, you do it,” this model proposes a plan of instruction that includes demonstration, prompt, and practice.

This graphic, from the work of Doug Fisher and Nancy Frey (2007), takes the model a step further by defining the specific stages in greater detail. Taken as a whole, the triangles represent the mentoring relationship and two-way interaction between the teacher and student. At the beginning of a lesson or when new material is being introduced, the teacher has a prominent role in the delivery of the content. This is the “I do” phase.

But as the student acquires the new information and skills, the responsibility of learning shifts from teacher-directed instruction to student processing activities. In the “We do” phase of learning, the teacher continues to model, question, prompt and cue students; but as student move into the “You do” phases, they rely more on themselves and less on the teacher to complete the learning task.
