

School Performance Plan Progress

Spanish Springs Elementary School

2022-2023

The SPP Committee at Spanish Springs Elementary School determined that the following would be our school-wide goals for the 2022-2023 school year:

School Goal 1: *By next state math exam increase school wide scores by 3%.*

How: *Teachers work together to identify areas of student need when analyzing data from common assessments and MAPs*

Status: On track to meet goal

School Goal 2: *Throughout the 2022-2023 school year, using Professional Learning Communities, PLC process, professionals will meet weekly where we will continue to support students during enrichment and intervention blocks where they will review School City Common Assessments. If the student shows they haven't learned the essential standard, the student will receive intervention options.*

How: *Since Teachers are meeting weekly, they can quickly adjust where needed for each individual student to provide intervention and enrichment*

Status: On track to meet goal

School Goal 3: *Lower chronic absenteeism by 1%*

How: *Increased attendance and connectedness*

Status: Not on track to meet goal

Why: A variety of factors including: stringent exclusion guidelines set by WCSD that have changed several times throughout the year, parent diligence in keeping sick students home as per school requests last couple of years, increased number of families taking students for vacation on times other than school breaks.

Amendment: Increase communication to families about importance of students needing to be at school and requests to take vacations during scheduled school breaks.
