

Full Time Distance Learning: Students take six classes at home, online daily. When students finish the course, they will need to schedule a time to come to campus to take their final exam for the class on Edgenuity. Students must take the final exam and score at least a 60% on the final and the class in order to pass each course. Students will need access to internet and a laptop/computer to access their courses. A teacher will be assigned to monitor and provide support for students as they work on classes every day via Edgenuity. Students who are assigned to distance learning your first day of school will be on Monday August 17th. Your distance learning team teacher will be reaching out to you on Monday. Intervention listed on your schedule is your distance learning contact teacher. Please log into your Edgenuity account by 8:00 on Monday August 17th. Attendance is required and expected daily. Attendance will be taken each afternoon. Students will be marked present if they are working in each class. Students will be supported by a staff member but much of the work will be independent and will need to be done at home with help or support from the family. For those students who are enrolled in ROTC, Manufacturing Tech, and Avid, your teachers will be contacting you on Monday or Tuesday. To access Edgenuity go to <https://student.edgenuity.com/>
