EXECUTIVE SUMMARY

This Debt Management Policy was created to fulfill the requirements of NRS 350.013. The District is generally limited in the bonds it can issue by its statutory debt limit, the \$3.64 limit on overlapping tax rates and the amount of revenue available to pay debt service on bonds. The policy discusses the outstanding and proposed debt of the District, its ability to afford such debt and other items relating to the issuance of bonds by the District.

As of June 30, 2015, the District has \$467,005,000 of general obligation bonds, \$7,261,732 of general obligation medium-term notes, and \$1,768,160 of medium-term QZABs outstanding. The District has approximately \$1,548,873,000 of available statutory debt limit.

The 2015 State Legislature approved legislation allowing the District to issue general obligation bonds over a ten-year period via a “rollover” authorization which allows the District to utilize revenues from the existing \$0.10 tax rate to repay bonds and provide funding for capital projects. The authorization will expire in 2025.

Issuance of bonds are conditional upon certain findings made by the District’s Board of Trustees and approval from the Washoe County Debt Management Commission and the Washoe County School District Bond Oversight Panel that such bonds can be paid within the existing property tax rate for school bond debt service. The District reserves the right to issue additional bonds at any time legal requirements are met.

The District enters into capital leases from time to time, which are payable from general fund revenues.

The District has identified the need for various capital improvement projects in its Capital Improvement Plan. A summary of that plan is attached as Appendix B.

The District issued its 2009A and 2010B School Improvement Bonds as Recovery Zone Economic Development Bonds ("RZEDBs") and is eligible for a 45% subsidy on the interest paid. This subsidy is paid by the federal government directly to the District. The 2010D and 2010E School Improvement Bonds are Qualified School Construction Bonds ("QSCBs") and are also subsidized by the federal government. The interest subsidy on the QSCBs is determined by the subsidy rate in place on the day the bonds were sold. Schedules in this document are based on the debt service net of the subsidy payments. As a result of the effects of certain provisions in the Budget Control Act of 2011 (the "Act") which became effective March 1, 2013 the subsidies will be cut. The subsidies on the District's have been reduced by 7.3% through September 30, 2015. The provisions of the Act prescribe cuts to the subsidies on direct pay bonds, RZEDBs and QSCBs, through federal fiscal year 2023. What these cuts may be and how long they will remain in effect are not currently certain.

Appendix A contains individual debt service schedules for each of the outstanding general obligation bond issues.

As illustrated in Appendix B - Capital Improvement Plan, the District anticipates the need for numerous capital projects for which general obligation bonds could be issued.

The following section demonstrates the ability of the District to make principal and interest payments on the outstanding bonds.

General Obligation Bonds

The District currently has \$467,005,000 of outstanding general obligation debt paid by the levy of a specific property tax. The following table details the payments on the outstanding bonds.

The District is currently levying a tax rate of \$0.3885 to repay the outstanding bonds. The revenues generated by the tax rate, the balance in the Debt Service Fund and interest earnings are anticipated to be sufficient to pay the outstanding bonds and any future bonds. The following table details the cashflows in the District's Debt Service Fund.

Proposed General Obligation Debt

The District currently has no authorization to issue general obligation bonds.

Medium-Term General Obligation Bonds

The District currently has \$7,261,732 of outstanding medium-term general obligation debt paid for with revenues from the General Fund. The District expects these resources to be sufficient to repay its medium term bonds. The following table details the payments on the outstanding general obligation medium-term bonds.

Other Debt

The District currently has \$1,768,160 of medium-term installment purchase Qualified Zone Academy Bonds (“QZABs”) outstanding. QZABs are low interest loans which are paid at the final maturity. The District sets aside funds annually in a sinking fund to provide for the payment. This debt is not counted against the general obligation debt limit. The District repays this other debt from revenues in the District’s General Fund.

General Obligation Debt Limit

NRS 350.013 1.(c)(2) A discussion of its capacity to incur authorized and proposed future general obligation debt without exceeding the applicable debt limit;

The District is limited by state statutes as to the amount of general obligation debt it can have outstanding. The limit is equal to 15 percent of the District’s total assessed valuation. As of June 30, 2015, the District has \$474,266,732 of general obligation debt outstanding. Based on the fiscal year 2015 assessed value, including the redevelopment agencies, the District’s available general obligation debt limit is approximately \$1,548,873,381.

Other factors also limit the amount of debt the District can issue. These factors include, but are not limited to, overlapping tax rates, available revenues, bond market conditions and type of projects to be funded.

General Obligation Debt Comparisons

NRS 350.013 1.(c)(3) A discussion of its general obligation debt that is payable from property taxes per capita as compared with such debt of other municipalities in this state;

NRS 350.013 1.(c)(4) A discussion of its general obligation debt that is payable from property taxes as a percentage of assessed valuation of all taxable property within the boundaries of the municipality;

Method of Sale

NRS 350.013 1.(c)(5) Policy regarding the manner in which the municipality expects to sell its debt;

Bonds can generally be sold at a competitive sale, negotiated sale or be privately placed.

Competitive Sale - Offering documents are sent to any firm interested in purchasing the bonds. A day and time are chosen for the sale and bonds are awarded to the firm offering the lowest true interest cost on the bonds (the "TIC"). The TIC is the discount rate which results in a present value of the future debt service payments equal to amount bid for the bonds.

Negotiated Sale - One firm, or group of firms, is chosen in advance to offer the bonds for sale. At the time of sale, interest rates and other terms of the bonds are negotiated with the Underwriter.

Private Placement - A purchaser, usually an individual or bank, is identified and the bonds are placed directly. Interest rates and other terms of the bonds are negotiated with the purchaser.

NRS 350 generally requires bonds issued by the District to be sold at competitive sale. For most District general obligation bonds a competitive sale will usually result in the lowest TIC on the bonds. There are certain circumstances under which the District would consider a negotiated sale or private placement. Such circumstances include, but are not limited to:

- 1) Bonds issued with a variable rate of interest
- 2) Bonds rated below A- or not rated
- 3) Very small or very large bond issues
- 4) Unstable or highly volatile markets
- 5) Bonds with unusual security or structure

The District will follow the requirements of NRS 350.155 in choosing a method of sale for its bonds. If the District determines that a negotiated sale is warranted for a general obligation bond or a bond secured by an excise tax, it will distribute a request for proposal to underwriting firms. The selection of an underwriter(s) will be based on a determination of the firm that demonstrates its ability to obtain the overall best interest rate for District. Consideration in making this determination will be given to the firm's experience with similar financings, proposed compensation structure and marketing plan.

Operational Costs of Future Capital Projects

NRS 350.013 1.(c)(7) A discussion of its operational costs and revenue sources, for the ensuing 5 fiscal years, associated with each project included in its plan for capital improvement submitted pursuant to paragraph (d), if those costs and revenues are expected to affect the property tax rate.

The District has prepared a Capital Improvement Plan, which is attached as Appendix B. The operational costs for the District are paid from the General Fund which receives revenue from local and State sources. The tax rate for the support of school districts is set by statute at \$.75. As such, any operational costs incurred by the District are not expected to affect the tax rate.

Capital Improvement Plan

NRS 350.013 1.(d) Either:

(1) Its plan for capital improvement for the ensuing 5 fiscal years, which must include any contemplated issuance of general obligation debt during this period and the sources of money projected to be available to pay the debt; or

(2) A statement indicating that no changes are contemplated in its plan for capital improvement for the ensuing 5 fiscal years.

The District's Capital Improvement Plan (CIP) is included in Appendix B. The District currently utilizes three funding sources for capital projects - investment income, Government Service Tax revenues and general obligation bonds. These funds are generally used for major repairs, remodeling and additions to school facilities. Larger capital projects have traditionally been funded with voter approved general obligation bonds.

The District enters into capital leases from time to time, which are payable from general fund revenues.

Chief Financial Officer of the District

NRS 350.013 1.(e) A statement containing the name, title, mailing address and telephone number of the chief financial officer of the municipality.

The chief financial officer of the District is:

APPENDIX B
CAPITAL IMPROVEMENT PLAN

**Capital Improvement Plan Summary
Washoe County School District**

The District reserves the right to issue general obligation bonds at any time legal requirements are met. Facility needs, District assessed value growth, and other factors will determine the timing and size of future bond issues.

The District has projected its facility needs through 2020. The following table lists the identified needs for the next five years. The District’s ability to fund the projects in a timely manner will depend on future assessed value growth and interest rates. The District intends to review and refine this list annually.
