

It is important that you and your students know how to use the Edgenuity tools to support their credit recovery experience. One simple tool (e.g., guided notes), can make a big impact on student success. Therefore, I will be sharing via email some quick tips on the various Edgenuity tools that you and your students have access to. I would highly encourage you to start the day with a quick 5-10 discussion on these tools and/or other class related topics. You can login as a student using your credentials to demonstrate these tools. If you need help with this, please let me know.

## Tip #1: Student Home Page

Be sure students understand the Home Page screen. The home page shows student current progress in the form of the Actual Grade and progress par. Remember, **green** is ahead, **blue** is on track, and **red** is behind. They can always click on the “Next Activity” button to resume where they left off in the course.

### Your Home Page

1. Here you see a list of all courses assigned to you, along with your current progress and course grade.
2. Click on the **title** of the course to explore the course map.
3. Or, click any blue **Next Activity** to begin working immediately in the course.

- 1 A progress bar shows your current progress. It also displays target progress if a start and target date have been assigned to the course by your teacher. This progress bar is blue if you are on track, green if you are ahead, and red when you start to fall behind.
- 2 The course tiles will also show you the current grade in each of your courses.
- 3 The icons at the top of each tile indicate the type of Edgenuity program you are assigned:
