

# Lab Safety

- 1. <u>Listen to or read</u> instructions carefully before attempting to do anything.
- 2. Wear <u>safety goggles</u> to protect your eyes from chemicals, heated materials, or things that might be able to shatter.
- 3. <u>Notify your teacher</u> if any spills or accidents occur.

- 4. After handling chemicals, always wash your hands with soap and water.
- 5. During lab work, <u>keep your hands</u> <u>away from your face</u>.
- 6. Tie back long hair.

7. Roll up loose <u>sleeves</u>.

- Know the <u>location</u> of the fire extinguisher, fire blanket, eyewash station, and first aid kit.
- 9. Keep your work area <u>uncluttered</u>. Take to the lab station only what is necessary.

- 10. It is suggested that you wear glasses rather than contact lenses.
- 11. Never put anything into your <u>mouth</u> during a lab experiment.
- 12. <u>Clean up your lab area</u> at the conclusion of the laboratory period.
- 13. Never "horse around" or play practical jokes in the laboratory.

- 1. <u>Chipped or cracked glassware</u> should not be used. Show it to the teacher.
- 2. <u>Broken glassware</u> should not be disposed of in a classroom trashcan. There is a special glass disposal container for it.
- 3. When pouring liquids into glassware, make sure the container you are pouring into is <u>resting on a table at</u> least a hands breadth from the edge.

#### **Glassware Safety**

### 4. If a piece of glassware gets broken, do not try to clean it up by yourself. <u>Notify the teacher</u>.

5. Do not place <u>hot glassware</u> in water. Rapid cooling may make it shatter.

#### **Chemical Safety**

- 1. Wear <u>protective goggles</u> whenever heating or pouring hazardous chemicals
- 2. <u>Never mix chemicals</u> together unless you are told to do so (and then only in the manner specified).
- 3. <u>Never taste</u> any chemicals (you should never taste anything in the lab).

#### **Chemical Safety**

4. If you need to smell the odor of a chemical, <u>waft</u> the fumes toward your nose with one hand. Do not put your nose over the container and inhale the fumes.

### **Chemical Safety**

- 5. <u>Follow the instructions</u> of your teacher when disposing of all chemicals.
- 6. <u>Wash your hands</u> after handling hazardous chemicals.

### **Heating Safety**

- 1. Use <u>tongs</u> and/or protective gloves to handle hot objects.
- 2. <u>Never reach</u> across an open flame or burner.

### **Heating Safety**

- 3. Always point the top ends of test tubes that are being heated <u>away</u> from people.
- 4. When heating a test tube, move it around slowly over the flame to distribute the <u>heat</u> evenly.

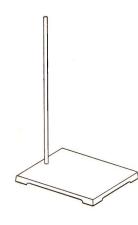

## **Heating Safety**

- 5. Only glassware that is thoroughly <u>dry</u> should be heated.
- Heat glassware by placing it on a wire gauze platform on a <u>ringstand</u>.
  Do not hold it in your <u>hand</u>.

#### **First Aid**

#### Injury: Burns

#### To Do: Immediately flush with <u>cold</u> water until burning sensation is lessened.

#### **First Aid**

- Injury: Cuts, bruises
- To Do: Do not <u>touch</u> an open wound without safety gloves. Pressing directly on minor cuts will stop bleeding in a few minutes. Apply cold compress to bruises to reduce <u>swelling</u>.

#### First Aid

Injury: The eyes

To Do: Flush eyes immediately with plenty of <u>water</u> for several minutes. If a foreign object is lodged in the eye, do not allow the eye to be <u>rubbed</u>.
