

Fractions as Division Problems

Unit 7, Station 4, Round 2,
Task 3

Solve each fraction as though it were a division problem. Write your answer.

Ex) $\frac{33}{4} = 8\frac{1}{4}$

1) $\frac{86}{9} =$

2) $\frac{22}{6} =$

3) $\frac{43}{8} =$

4) $\frac{51}{7} =$

5) $\frac{15}{2} =$

6) $\frac{38}{5} =$

7) $\frac{13}{2} =$

8) $\frac{17}{2} =$

9) $\frac{97}{9} =$

10) $\frac{9}{2} =$

11) $\frac{10}{3} =$

12) $\frac{61}{7} =$

13) $\frac{28}{3} =$

14) $\frac{61}{10} =$

15) $\frac{11}{2} =$

16) $\frac{37}{7} =$

17) $\frac{23}{8} =$

18) $\frac{17}{5} =$

19) $\frac{65}{10} =$

20) $\frac{53}{6} =$

Ex. $8\frac{1}{4}$

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

9. _____

10. _____

11. _____

12. _____

13. _____

14. _____

15. _____

16. _____

17. _____

18. _____

19. _____

20. _____
