BIG
Business Intelligence Gateway

What is WCSD's Business Intelligence Gateway (BIG)?

BIG is an internal data reporting website that WCSD uses to display data dashboards and academic information that is updated daily. The purpose of BIG is to give an overview of data that is important to teachers, principals, school staff and the district at large. For example, the Student Profile Report provides *Demographics, Assessment, Attendance, and Grade information* for a select student in one convenient, easy-to-use report. Access to BIG is restricted to authorize users, and usage of information in BIG is strictly limited to educational purposes.

BIG System Requirements

- BIG can only be accessed from within a school district facility and from a district-supported computer, laptop, or tablet. BIG cannot be access from a non-school district site, such as your home computer or a mobile phone.
- BIG has been tested and is supported on PC-based devices. However, BIG may work on some non-supported devices, such as Apple iPads and Macbooks.
- BIG has been tested and is supported on the Internet Explorer (IE) web browser. Some functionality may be lost when using Chrome, Firefox, or Safari web browsers. When possible, it is recommended to use Internet Explorer to maximize your BIG experience.
