

Five/Ten Frame Math

How many number combinations can you use to make 5 or 10?

Start with practice with the five frame and introduce the ten frame at a later time when your child feels comfortable with the activity.

1. Roll out 5 or 10 coins, have your child place one on each frame. Encourage them to count The heads and tails separately. What number do you get when you count them all together?
2. Keep trying and find out how many ways you can make number 5 or 10!

5 Frame

$$3 + 2 = 5$$

10 Frame

$$7 + 3 = 10$$

3. Keep trying and find out how many ways you can make number 5 or 10!
