

STAY HEALTHY AT SCHOOL

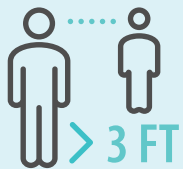

Some Tips on How to Keep
Yourself & Others Safe.

Before putting on your **face covering**, wash your hands. Put your face covering over your nose and mouth, making sure it goes under your chin and fits snugly against the sides of your face. Don't put the covering around your neck, over your forehead or under your nose.

Wash your hands with soap and water for 20 seconds— about the time it takes to sing your ABCs! If soap and water aren't available, you can use an alcohol-based hand sanitizer.

Maintain at least 3 feet from others whenever you can, and don't gather in large groups of people.
